

Determining Change - One Cost , Multiple Items

Name: _____

Solve each problem.

- 1) Katie's mom bought 2 movie tickets. Each ticket was priced at \$8.60 and she paid 20 dollars. How much change should she get?

- 2) Lana bought 3 bags of flour for baking cakes. Each bag costs \$2.15. She paid with 20 dollars. How much change should she get back?

- 3) Roger's dad bought 2 pairs of shoes at the shoe store. If the price per pair is \$6.65 and he pays 20 dollars, how much change should he get back?

- 4) Bianca bought 2 bouquets at the florist. Paying 20 dollars for bouquets priced at \$8.20 each, how much change should she receive?

- 5) Cody wants to buy 2 paintbrushes for his art class. The cost of each is \$4.25. If he pays with 20 dollars, what is the amount of change he should receive?

- 6) Carol bought 4 t-shirts at the clothing store during a big sale. Each t-shirt cost \$4.30 and she paid 20 dollars. What is the amount of change she should receive?

- 7) Edward saw his favorite chips on sale for \$1.90 per bag. He decided to buy 2 bags and paid the cashier 20 dollars. Calculate his change.

- 8) Faye is at a book fair, where she buys 3 books. If each book costs \$5.90, and she pays with 20 dollars, how much is her change?

- 9) Emily is buying 2 gardening tools, each priced at \$4.80. She pays 20 dollars. How much change is she owed?

- 10) Henry bought 3 model cars at the toy store. If each model costs \$5.25 and he pays with 20 dollars, how much change will he receive?

10. _____

Solve each problem.

1) Katie's mom bought 2 movie tickets. Each ticket was priced at \$8.60 and she paid 20 dollars. How much change should she get?

$$8.60 \times 2 = 17.20$$

2) Lana bought 3 bags of flour for baking cakes. Each bag costs \$2.15. She paid with 20 dollars. How much change should she get back?

$$2.15 \times 3 = 6.45$$

3) Roger's dad bought 2 pairs of shoes at the shoe store. If the price per pair is \$6.65 and he pays 20 dollars, how much change should he get back?

$$6.65 \times 2 = 13.30$$

4) Bianca bought 2 bouquets at the florist. Paying 20 dollars for bouquets priced at \$8.20 each, how much change should she receive?

$$8.20 \times 2 = 16.40$$

5) Cody wants to buy 2 paintbrushes for his art class. The cost of each is \$4.25. If he pays with 20 dollars, what is the amount of change he should receive?

$$4.25 \times 2 = 8.50$$

6) Carol bought 4 t-shirts at the clothing store during a big sale. Each t-shirt cost \$4.30 and she paid 20 dollars. What is the amount of change she should receive?

$$4.30 \times 4 = 17.20$$

7) Edward saw his favorite chips on sale for \$1.90 per bag. He decided to buy 2 bags and paid the cashier 20 dollars. Calculate his change.

$$1.90 \times 2 = 3.80$$

8) Faye is at a book fair, where she buys 3 books. If each book costs \$5.90, and she pays with 20 dollars, how much is her change?

$$5.90 \times 3 = 17.70$$

9) Emily is buying 2 gardening tools, each priced at \$4.80. She pays 20 dollars. How much change is she owed?

$$4.80 \times 2 = 9.60$$

10) Henry bought 3 model cars at the toy store. If each model costs \$5.25 and he pays with 20 dollars, how much change will he receive?

$$5.25 \times 3 = 15.75$$

Answers1. **\$2.80**2. **\$13.55**3. **\$6.70**4. **\$3.60**5. **\$11.50**6. **\$2.80**7. **\$16.20**8. **\$2.30**9. **\$10.40**10. **\$4.25**
