

Name:

Let's talk about a cool little creature, the green anole! This tiny lizard is a brilliant green color, but did you know it can change its color to brown too? They have a long tail, and males have a neat pink throat fan called a dewlap, which they show off to attract females or scare away other males. Isn't it amazing how these little guys are so colorful and interesting?

Speaking of colorful and interesting, let's explore the world of green anoles. Green anoles are native to North America, living mostly in the southeastern United States, and they love hanging out in trees and shrubs. Their diet mainly consists of insects, like crickets, roaches, and mealworms, and they drink by licking dew or rain off of leaves. Nature is their supermarket, isn't it?

From their supermarket in nature, let's move on to their relationship with other creatures. Green anoles are quite peaceful and prefer to avoid conflict, but they will defend their territory from other males. With humans, they can be quite shy at first, but with time and patience, they can become comfortable and even eat out of a person's hand. Green anoles also play an important role in the ecosystem by controlling insect populations.

Now that we've seen how they interact, let's compare green anoles to other species. Unlike some lizards, green anoles can change their color based on their mood, temperature, and health. Their life cycle is also fascinating, with females laying single eggs every couple of weeks in the warm months, which hatch into little lizards after about a month or two. So, to wrap it up, green anoles are amazing creatures with their colorchanging abilities, interesting diet, and important role in the ecosystem.

#### Solve each problem. Use the article to answer the question. 1) How do green anoles behave around humans? A. They are shy at first, but can become B. They always remain shy comfortable with time C. They are always comfortable D. They are aggressive 2) What is unique about green anoles compared to some other lizards? A. They can lose and regrow their tail B. They can change their color C. They can glide with flaps under their D. They can live underwater arms 3) How do green anoles drink water? A. They lick dew or rain off of leaves B. They drink from streams C. They absorb it through their skin D. They get it from the food they eat 4) What do green anoles mostly eat? A. Plants and fruits B. Seeds and nuts C. Small animals like mice and birds D. Insects 5) How do green anoles react when they are faced with other males that are intruding their territory? A. They invite them to share their B. They leave their territory territory C. They defend their territory D. They ignore them 6) What do male green anoles use to attract females? A. A throat fan called dewlap B. Their green color C. Their long tail D. Their ability to climb trees 7) Where do green anoles primarily live? A. In the Southwestern United States B. In the southeastern United States C. In desert areas D. In the northeastern United States 8) Where do green anoles usually live? A. In water bodies. B. In caves. C. In sandy deserts. D. In trees and shrubs. 9) What color is the dewlap? A. Pink B. Yellow C. Red D. Green 10) How often do female green anoles lay eggs in the warm months? A. Once a month B. Once a year C. Every day D. Every couple of weeks

|             |  | reen Anole                   | Name:                   | Answer Key |  |  |  |  |
| 11)         | What can a green anole change its co<br>A. Black   | B. Red                       |                         |            |  |  |  |  |
|             | C. Blue  | D. Brown                     |                         |            |  |  |  |  |
|             |  |                              |                         |            |  |  |  |  |
|             | Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).  |                              |                         |            |  |  |  |  |
| 12)         | "You know what? I don't lay a ton of eggs like some animals. Just one at a time, every few weeks, during warm months." |                              |                         |            |  |  |  |  |
| 13)         | "I can be green or brown."   |                              |                         |            |  |  |  |  |
| 14)         | "My favorite meals are crickets, road  | ches, and mealworms Yu       | ım!"                    |            |  |  |  |  |
| 15)         | "Unlike my fellow lizards who can change their colors based on the surroundings, I just stick to my one color!"        |                              |                         |            |  |  |  |  |
| 16)         | "I can change my color depending on how I feel, the temperature, or how healthy I am. It's really fun to show off!"    |                              |                         |            |  |  |  |  |
| 17)         | "My dewlap is blue in color."  |                              |                         |            |  |  |  |  |
| <b>18</b> ) | "At first, I might be shy, but I can ge  | t used to you and even eat   | from your hand."        |            |  |  |  |  |
| <b>19</b> ) | "Let me be clear, I prefer to live in th   | ne desert not in trees and s | hrubs."                 |            |  |  |  |  |
| 20)         | "Drinking water is a bit different for me, I find small bodies of water and take sips from there."                     |                              |                         |            |  |  |  |  |
| 21)         | "I cannot change my color."  |                              |                         |            |  |  |  |  |
| Dete        | ermine if the statement is a fact or o   | pinion based on the info     | rmation in the article. |            |  |  |  |  |
| 22)         | Females of the green anole lay a sing  | gle egg every few weeks ir   | n warm months.          |            |  |  |  |  |
| 23)         | The bright pink throat fan of a male green anole looks really cool.  |                              |                         |            |  |  |  |  |
| 24)         | Males of the green anole have a pink   | throat fan called a dewlag   | ).                      |            |  |  |  |  |
| 25)         | It's amazing how green anoles can be person's hand.  | ecome comfortable with h     | umans and eat out of a  |            |  |  |  |  |
| 26)         | Green anoles can be found mostly in  | the southeastern part of th  | ne United States.       |            |  |  |  |  |
| 27)         | It is really cool that green anoles can  | change their color to brow   | vn.                     |            |  |  |  |  |
| 28)         | The color of the green anole can chan  | nge based on mood, tempe     | erature, and health.    |            |  |  |  |  |
| 29)         | Green anoles eat insects such as road  | hes and mealworms.           |                         |            |  |  |  |  |
| 30)         | It is amazing to see how quickly gree  | en anoles can climb up tree  | es and shrubs.          |            |  |  |  |  |
| 31)         | Green anoles are the most beautiful l  | izards because of their bri  | ght green color.        |            |  |  |  |  |
| Dete        | ermine if the statement is true or fal   | se.                          |                         |            |  |  |  |  |
| 32)         | Green anoles drink by licking dew or   |                              |                         |            |  |  |  |  |
| 33)         | Green anoles lay eggs in the winter r  | nonths.                      |                         |            |  |  |  |  |
| 34)         | Green anoles lay a single egg every of   |                              | rm months.              |            |  |  |  |  |
| 35)         | Males green anoles have a blue throa   | it fan called a dewlap.      |                         |            |  |  |  |  |
| 36)         | The main diet of green anoles is inse  | cts.                         |                         |            |  |  |  |  |
| 37)         | Green anoles live in burrows underg  | round.                       |                         |            |  |  |  |  |

| 10)  | How often do female green anoles lay eggs  | in th≏                       | warm monthe? (norseront 4)   |                |
| 10)  | A.   |                              | Once a year                  |                |
|      | C.   |                              | Every couple of weeks        |                |
|      |  |                              |                              |                |
| 11)  | What can a green anole change its color to?  |                              | aph 1)                       |                |
|      | A. Black<br>C.   | B.<br>D                      | Brown                        |                |
|      | <b>C</b> .   | υ.                           |                              |                |

### Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

12) "You know what? I don't lay a ton of eggs like some animals. Just one at a time, every few weeks, during warm months." (paragraph 4)
