Imagine meeting a snake with a mouth as white as cotton that's the cottonmouth snake for you! Also known as water moccasins, these snakes sport a dark, thick body that can grow up to 4 feet long. Their heads are broad and triangular, and when they open their mouths, they display a white, cotton-like

interior, hence the name cottonmouth. But don't let their appearance scare you, they're fascinating creatures!

Speaking of fascinating, let's dive into their interesting habitat and diet. Cottonmouth snakes are found in the southeastern United States, often near freshwater bodies like swamps, marshes, and streams. In terms of food, they're not picky eaters at all, munching on everything from fish and frogs, to small mammals and birds! Sometimes, they even eat other snakes, talk about a unique diet!

From their unique diet, let's slither to their life cycle and relationship with other animals. Cottonmouths have an interesting life cycle, starting as eggs inside their mother, they're then born live, which is a bit different from many other snakes that lay eggs. They prefer to keep to themselves and are usually not aggressive unless provoked. However, they play an important role in the ecosystem by controlling the population of their prey.

Now that we know about their life and role, how do they interact with us humans? Well, cottonmouths are known to be the only venomous water snake in North America, so it's best to admire them from a distance. While they're not usually aggressive, they will defend themselves if they feel threatened, often by displaying their namesake cotton-white mouth as a warning before striking. So, remember kids, if you see a cottonmouth, admire its beauty from afar, and let it continue its important role in nature!

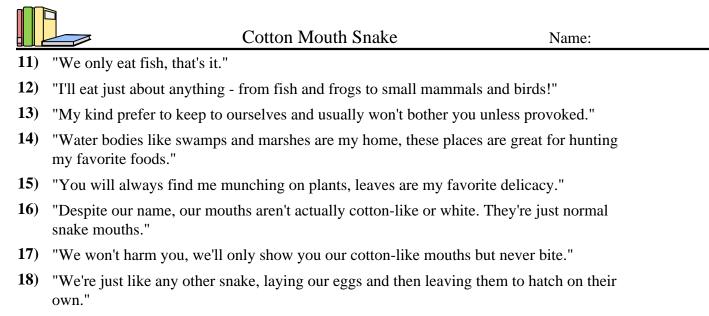

Cotton Mouth Snake

### Solve each problem.

Use	the article to answer the question.		
1)	What is the length of a cottonmouth snake?		
	A. Around 2 feet long	В.	Up to 10 feet long
	C. Less than a foot long	D.	Up to 4 feet long
2)	Are cottonmouth snakes aggressive?		
,	A. Yes, all the time	B.	Only when they are hungry
	C. Only during the winter season	D.	Not usually
3)	Where can you find the cottonmouth snakes?		
- /	A. In the southwestern United States		In the northeastern United States
	C. In the southeastern United States	D.	In the northwestern United States
4)	How do cottonmouth snakes play a role in the	e ec	osystem?
	A. They control the population of their	В.	They help pollinate flowers
	prey C. They clean the water in freshwater	Л	They provide shelter for other
	bodies	D.	animals
5)	What is unique about the life cycle of cottonn	nou	th snakes?
2)	A. They never shed their skin		They can breathe underwater
	C. They are born live, unlike most		They hibernate during winter
	snakes that lay eggs		
6)	What does the inside of a cottonmouth snake'	s m	outh look like?
	A. As white as cotton	В.	As red as a cherry
	C. As black as coal	D.	As green as grass
7)	What type of bodies of water do cottonmouth	sna	akes often live near?
	A. Desert oasis	В.	Oceans and seas
	C. Hot springs and geysers	D.	Swamps, marshes, and streams
8)	What is the nickname for a cottonmouth snak	e?	
,	A. Muddy python	B.	Water moccasins
	C. Cotton bear	D.	Grassy cobra
9)	How do cottonmouth snakes defend themselv	ves v	when they feel threatened?
	A. By shooting venom from their mouths	B.	By playing dead
	C. By suddenly slithering away at high	D.	By displaying their cotton-white
	speed		mouth as a warning before they strike
10)	Where are cottonmouth snakes often found?		
	A. In the Arctic	B.	Near freshwater bodies
	C. Near deserts	D.	In the mountains

## Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- **19)** "My mouth is as dark as the starry night sky."
- **20)** "We cottonmouth snakes are a bit different from other snakes because we're born alive instead of hatching from eggs."
- 21) "We're not fond of water. In fact, we avoid it and instead, live in the dry sandy deserts."
- **22)** "I'm called a cottonmouth snake because when I open my mouth, it looks like there's cotton in there!"

### Determine if the statement is a fact or opinion based on the information in the article.

- 23) Cottonmouth snakes are the only venomous water snake in North America.
- 24) Cottonmouths have a more interesting diet than other snakes.
- **25)** Cottonmouth snakes can grow up to 4 feet long.
- **26)** Cottonmouths are really scary because they are the only venomous water snake in North America.
- 27) Cottonmouth snakes are commonly found in the southeastern United States.
- **28)** The fact Cottonmouth snake will eat other snakes is quite disgusting.
- **29**) Cottonmouth snakes eat fish, frogs, small mammals, birds, and sometimes other snakes.
- **30)** Cottonmouth snakes generally make their homes near freshwater bodies, such as swamps and marshes.
- **31**) It is fascinating to see cottonmouth snakes coming out of their mother instead of hatching from eggs.
- **32)** It is really scary to see the white inside of a cottonmouth snake's mouth.

## Determine if the statement is true or false.

- **33**) Cottonmouth snakes have a white, cotton-like interior in their mouth.
- 34) When they feel threatened, cottonmouths inflate their bodies to scare away predators.
- **35)** Cottonmouth snakes can grow up to 4 feet long.
- **36)** Cottonmouth snakes are only found in the desert.
- **37)** Cottonmouths are found in the southeastern United States.
- **38)** Cottonmouth snakes are only found in South Carolina.

- **39**) Cottonmouth snakes are herbivores.
- **40**) Cottonmouth snakes are not venomous.
- 41) Cottonmouth snakes are the only venomous water snake in North America.
- 42) Cottonmouths are also known as water moccasins.

# Determine if the sentence is a declarative(d), exclamatory(e), interrogative(i) or imperative(m).

- **43**) Cottonmouth snakes are semi-aquatic and are often found near bodies of water.
- 44) What are the warning signs of a cotton mouth snake bite?
- **45**) Cottonmouth snakes are found in the southeastern United States.
- 46) Cottonmouth snakes are also known as water moccasins.
- **47)** How do cotton mouth snakes defend themselves?
- **48)** How venomous are cotton mouth snakes?
