

Use addition strategies with place value to solve.

Ex) $246 + 734 = \underline{980}$
 $6 + 4 = 10$
 $40 + 30 = 70$
 $200 + 700 = \underline{900}$
 980

2) $198 + 147 = \underline{345}$
 $8 + 7 = 15$
 $90 + 40 = 130$
 $100 + 100 = \underline{200}$
 345

4) $742 - 406 = \underline{336}$
 $2 - 6 = -4$
 $40 - 0 = 40$
 $700 - 400 = \underline{300}$
 336

6) $354 + 465 = \underline{819}$
 $4 + 5 = 9$
 $50 + 60 = 110$
 $300 + 400 = \underline{700}$
 819

8) $644 - 343 = \underline{301}$
 $4 - 3 = 1$
 $40 - 40 = 0$
 $600 - 300 = \underline{300}$
 301

10) $906 - 742 = \underline{164}$
 $6 - 2 = 4$
 $0 - 40 = -40$
 $900 - 700 = \underline{200}$
 164

1) $524 - 449 = \underline{75}$
 $4 - 9 = -5$
 $20 - 40 = -20$
 $500 - 400 = \underline{100}$
 75

3) $44 + 444 = \underline{488}$
 $4 + 4 = 8$
 $40 + 40 = 80$
 $0 + 400 = \underline{400}$
 488

5) $964 - 815 = \underline{149}$
 $4 - 5 = -1$
 $60 - 10 = 50$
 $900 - 800 = \underline{100}$
 149

7) $505 + 215 = \underline{720}$
 $5 + 5 = 10$
 $0 + 10 = 10$
 $500 + 200 = \underline{700}$
 720

9) $790 - 757 = \underline{33}$
 $0 - 7 = -7$
 $90 - 50 = 40$
 $700 - 700 = \underline{0}$
 33

11) $224 - 149 = \underline{75}$
 $4 - 9 = -5$
 $20 - 40 = -20$
 $200 - 100 = \underline{100}$
 75

Answers

Ex. $\underline{980}$

1. $\underline{75}$

2. $\underline{345}$

3. $\underline{488}$

4. $\underline{336}$

5. $\underline{149}$

6. $\underline{819}$

7. $\underline{720}$

8. $\underline{301}$

9. $\underline{33}$

10. $\underline{164}$

11. $\underline{75}$
