

Use the completed division problem to answer the question.

Answers

- 1) At the carnival, four friends bought eighteen tickets. If they wanted to split all the tickets so each friend got the same amount, how many more tickets would they need to buy? $18 \div 4 = 4 \text{ r}2$
- 2) A box can hold six brownies. If a baker made thirty-two brownies, how many full boxes of brownies did he make? $32 \div 6 = 5 \text{ r}2$
- 3) Katie had twenty-three photos to put into a photo album. If each page holds six photos, how many full pages will she have? $23 \div 6 = 3 \text{ r}5$
- 4) A restaurant needs to buy fifty-one new plates. If each box has six plates in it, how many boxes will they need to buy? $51 \div 6 = 8 \text{ r}3$
- 5) It takes nine apples to make an apple pie. If a chef bought fifty-one apples, the last pie would need how many more apples? $51 \div 9 = 5 \text{ r}6$
- 6) A vase can hold eight flowers. If a florist had twenty-one flowers she wanted to put equally into vases, how many flowers would be in the last vase that isn't full? $21 \div 8 = 2 \text{ r}5$
- 7) A machine in a candy company creates forty-three pieces of candy a minute. If a small box of candy has nine pieces in it how many full boxes does the machine make in a minute? $43 \div 9 = 4 \text{ r}7$
- 8) Will was trying to beat his old score of thirty-four points in a video game. If he scores exactly five points each round, how many rounds would he need to play to beat his old score? $34 \div 5 = 6 \text{ r}4$
- 9) Rachel had twenty-three songs on her mp3 player. If she wanted to put the songs equally into three different playlists, how many songs would she have left over? $23 \div 3 = 7 \text{ r}2$
- 10) A school had sixteen students sign up for the trivia teams. If they wanted to have seven team, with the same number of students on each team, how many more students would need to sign up? $16 \div 7 = 2 \text{ r}2$
