

Solve each problem.

1) $\frac{6}{10} - \frac{1}{2} =$

2) $\frac{5}{10} + \frac{3}{6} =$

3) $\frac{1}{2} - \frac{1}{3} =$

4) $\frac{6}{7} + \frac{2}{10} =$

5) $\frac{6}{10} - \frac{2}{7} =$

6) $\frac{2}{3} + \frac{2}{8} =$

7) $\frac{5}{9} - \frac{4}{10} =$

8) $\frac{2}{3} + \frac{1}{5} =$

9) $\frac{3}{5} - \frac{5}{10} =$

10) $\frac{1}{3} + \frac{1}{4} =$

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Solve each problem.

1) $\frac{6}{10} - \frac{1}{2} = \frac{6}{10} - \frac{5}{10} = \frac{1}{10}$

2) $\frac{5}{10} + \frac{3}{6} = \frac{15}{30} + \frac{15}{30} = 1\frac{0}{30}$

3) $\frac{1}{2} - \frac{1}{3} = \frac{3}{6} - \frac{2}{6} = \frac{1}{6}$

4) $\frac{6}{7} + \frac{2}{10} = \frac{60}{70} + \frac{14}{70} = 1\frac{4}{70}$

5) $\frac{6}{10} - \frac{2}{7} = \frac{42}{70} - \frac{20}{70} = \frac{22}{70}$

6) $\frac{2}{3} + \frac{2}{8} = \frac{16}{24} + \frac{6}{24} = \frac{22}{24}$

7) $\frac{5}{9} - \frac{4}{10} = \frac{50}{90} - \frac{36}{90} = \frac{14}{90}$

8) $\frac{2}{3} + \frac{1}{5} = \frac{10}{15} + \frac{3}{15} = \frac{13}{15}$

9) $\frac{3}{5} - \frac{5}{10} = \frac{6}{10} - \frac{5}{10} = \frac{1}{10}$

10) $\frac{1}{3} + \frac{1}{4} = \frac{4}{12} + \frac{3}{12} = \frac{7}{12}$

Answers

1. $\frac{1}{10}$

2. $1\frac{0}{30}$

3. $\frac{1}{6}$

4. $1\frac{4}{70}$

5. $\frac{22}{70}$

6. $\frac{22}{24}$

7. $\frac{14}{90}$

8. $\frac{13}{15}$

9. $\frac{1}{10}$

10. $\frac{7}{12}$
