

Convert each decimal to a fraction.

Converting from a decimal to a fraction is simple as long as you remember the place values.

0.9

The example above is nine-tenths. Lets look at how we'd write that as a fraction.

9/10

0.63

We do the same thing for the problem above. But because it is into the hundredths place we put our number over 100.

63/100
