

Two Step Problems

Name: _____

Solve each problem.

- 1) Sam made twenty-eight dollars mowing lawns and eight dollars weed eating. If he only spent six dollars a week, how long would the money last him?

- 2) For Halloween Sarah received two pieces of candy from neighbors and thirty-three pieces from her older sister. If she only ate five pieces a day, how long would the candy last her?

- 3) The school's debate team had four boys and fifty-two girls on it. If they were split into groups of eight how many groups could they make?

- 4) A group of six friends went into a restaurant. The chef already had fourteen chicken wings cooked but cooked four more for the group. If they each got the same amount how many would each person get?

- 5) For a birthday party Dave bought twelve regular sodas and fifteen diet sodas. If his fridge would only hold three on each shelf, how many shelves would he fill up?

- 6) Gwen's class is going on a field trip to the zoo. If each van can hold three people and there are twenty-one students and six adults going, how many vans will they need?

- 7) For homework Vanessa had six math problems and six spelling problems. If she can finish three problems in an hour how long will it take her to finish all the problems?

- 8) Roger was organizing his baseball cards in a binder with four on each page. If he had twelve new cards and four old cards to put in the binder, how many pages would he use?

- 9) While playing at the arcade, George won fifteen tickets playing 'whack a mole' and three tickets playing 'skee ball'. If he was trying to buy candy that cost three tickets a piece, how many could he buy?

- 10) A vase can hold six flowers. If you had twenty-three carnations and twenty-five roses, how many vases would you need to hold the flowers?

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Two Step Problems

Name: **Answer Key**

Solve each problem.

- 1) Sam made twenty-eight dollars mowing lawns and eight dollars weed eating. If he only spent six dollars a week, how long would the money last him?
1. **6**
- 2) For Halloween Sarah received two pieces of candy from neighbors and thirty-three pieces from her older sister. If she only ate five pieces a day, how long would the candy last her?
2. **7**
