

Solve each problem.

Answers

- 1) Robin bought four new chairs and three new tables for her house. If she spent six minutes on each piece furniture putting it together, how many minutes did it take her to finish?
- 2) A waiter had five tables he was waiting on, with two women and five men at each table. How many customers total did the waiter have?
- 3) Gwen's favorite band was holding a concert where tickets were nine dollars each. Gwen bought two tickets for herself and her friends and two extra tickets in case anyone else wanted to go. How much did she spend?
- 4) While shopping for music online, Maria bought two country albums and six pop albums. Each album came with a lyric sheet and had six songs. How many songs did Maria buy total?
- 5) Frank was collecting cans for recycling. On Saturday he filled four bags up and on Sunday he filled six more bags. If each bag had five cans in it, how many cans did he pick up total?
- 6) At Luke's Restaurant a group with two adults and two children came in to eat. If each meal cost six dollars, how much was the bill?
- 7) Emily was organizing her book case making sure each of the shelves had exactly six books on it. If she had eight shelves of mystery books and two shelves of picture books, how many books did she have total?
- 8) Bianca was selling her necklaces at a garage sale. She sold two bead necklaces and two gem stone necklaces. If each necklace cost seven dollars, how much money did she earn?
- 9) While playing a trivia game, Jerry answered eight questions correct in the first half and two questions correct in the second half. If each question was worth five points, what was his final score?
- 10) Mike was putting his spare change into piles. He had seven piles of quarters and three piles of dimes. If each pile had eight coins in it, how many coins did he have total?

1. _____
