

**Solve each problem.****Answers**

- 1) Oliver started his own lawn mowing business. In the spring he made thirty-three dollars mowing lawns and in the summer he made thirty-two dollars. If he had to spend sixteen dollars buying supplies, how much money did he end up with?
- 2) The school cafeteria ordered four red apples and thirty-seven green apples for student's lunches. But, if only thirty-one students wanted fruit, how many extra did the cafeteria end up with?
- 3) Olivia bought two coloring books. One had twenty-nine pictures and the other had thirty-nine. After one week she had already colored twenty-three of the pictures. How many pictures does she still have to color?
- 4) A waiter at 'The Greasy Spoon' restaurant had twenty-three customers to wait on. During the lunch rush he added another forty customers. If fifty-one of the customers didn't leave him a tip, how many customers did leave a tip?
- 5) Debby picked forty-four tulips and forty-six roses to make flower bouquets. If she only used seventeen of the flowers though, how many extra flowers did Debby pick?
- 6) A pet store had nine siamese cats and forty-nine house cats. During a sale they sold four cats. How many cats do they have left?
- 7) While shopping, Rachel bought thirty-eight green towels and twenty-two white towels. If she gave her mother thirty-seven of them, how many towels did Rachel end up with?
- 8) Tom was trying to expand his game collection. He bought forty-five games from a friend and bought thirty-nine more at a garage sale. If thirty of the games didn't work, how many good games did he end up with?
- 9) Maria had thirty-eight math problems and two science problems for homework. If she finished eight of the problems at school, how many problems did she have to do for homework?
- 10) For the school bake sale Isabel made pastries. She baked fifty cupcakes and thirteen cookies. After the sale she had forty-two to take back home. How many pastries did she sell?
