

**Determine which choice shows the expression used to solve the problem.****Answers**

- 1) John bought three boxes of candy with each box having two pieces inside of it. How many pieces of candy did he have total?  
A.  $3 + 2$                       B.  $3 - 2$                       C.  $3 \times 2$                       D.  $3 \div 2$
- 2) There are twenty-four people attending a luncheon. If a table can hold six people, how many tables do they need?  
A.  $24 + 6$                       B.  $24 - 6$                       C.  $24 \times 6$                       D.  $24 \div 6$
- 3) Janet received six dollars for her birthday. Later she found some toys that cost three dollars each. How many of the toys could she buy?  
A.  $6 + 3$                       B.  $6 - 3$                       C.  $6 \times 3$                       D.  $6 \div 3$
- 4) An architect was building a hotel downtown. He built it four stories tall with five rooms on each story. How many rooms does the hotel have total?  
A.  $4 + 5$                       B.  $5 - 4$                       C.  $4 \times 5$                       D.  $5 \div 4$
- 5) Cody bought nine boxes of candy. Later he bought two more boxes. How many boxes did he have total?  
A.  $9 + 2$                       B.  $9 - 2$                       C.  $9 \times 2$                       D.  $9 \div 2$
- 6) A delivery driver had to deliver eight packages. At his first stop he dropped off two. How many packages does he still have to deliver?  
A.  $8 + 2$                       B.  $8 - 2$                       C.  $8 \times 2$                       D.  $8 \div 2$
- 7) Maria had seven apps on her phone. To free up some space she deleted four of the apps. How many apps did she have left?  
A.  $7 + 4$                       B.  $7 - 4$                       C.  $7 \times 4$                       D.  $7 \div 4$
- 8) For Vanessa's birthday she received fifteen dollars. If she spent nine dollars. How much money did she still have?  
A.  $15 + 9$                       B.  $15 - 9$                       C.  $15 \times 9$                       D.  $15 \div 9$
- 9) At the school Halloween party four girls and seven boys dressed as ghosts. How many people total dressed as a ghost?  
A.  $4 + 7$                       B.  $7 - 4$                       C.  $4 \times 7$                       D.  $7 \div 4$
- 10) For the new school year Nancy's mom bought ten folders. If each class needs five folders, how many classes does Nancy have?  
A.  $10 + 5$                       B.  $10 - 5$                       C.  $10 \times 5$                       D.  $10 \div 5$
