Answers

## Determine which choice shows the expression used to solve the problem.

1) Jerry was playing games at the carnival. At the ring toss booth you get six rings for \$1. If John spent seven dollars, how many rings did he get?

A. 
$$6 + 7$$

C. 
$$6 \times 7$$

D. 
$$7 \div 6$$

2) There are ten students in the school band. If the band instructor put the students into rows with two students in each row, how many rows could he make?

A. 
$$10 + 2$$

C. 
$$10 \times 2$$

D. 
$$10 \div 2$$

3) Katie had to complete three pages of math homework and four pages of reading homework. How many pages did she have to complete total?

A. 
$$3 + 4$$

C. 
$$3 \times 4$$

D. 
$$4 \div 3$$

4) At the state fair Victor spent eight tickets on the roller coaster and nine tickets on the ferris wheel. How many tickets did he spend total?

A. 
$$8 + 9$$

C. 
$$8 \times 9$$

5) Kaleb was playing dodgeball with his friends and scored forty-five points total. If he scored nine points each round, how many rounds did he play?

A. 
$$45 + 9$$

C. 
$$45 \times 9$$

D. 
$$45 \div 9$$

6) There are fifty-four students in a class. If the teacher put them into groups with six students in each group, how many groups would she have?

A. 
$$54 + 6$$

C. 
$$54 \times 6$$

D. 
$$54 \div 6$$

7) For Faye's birthday seven of her friends gave her nine dollars. How much money did she get for her birthday?

A. 
$$7 + 9$$

C. 
$$7 \times 9$$

**8)** An architect built a house with thirteen bedrooms total. If the second floor had six bedrooms. How many bedrooms does the first floor have?

A. 
$$13 + 6$$

C. 
$$13 \times 6$$

9) Robin had eleven math problems for homework. If she finished three of them on the bus ride home, how many more did she have to do?

A. 
$$11 + 3$$
