Two Step Problems

Name:

Solve each problem.

1) Lana bought an app that cost $2 dollars. Then each month you have to pay $8 to play online. If she played the game online for 9 months, how much money would she have spent total for the app and the online access?

2) Frank earned 3 dollars for every lawn he mowed. If he mowed 5 lawns and he already had 2 dollars saved up, how much money does he have total?

3) At the arcade Faye had 8 tickets she saved from the last time she went. This time she played a game 2 times and earned 4 tickets each time she played. How many tickets does she have now?

4) A pet store sold 8 kittens and 1 puppy over the weekend. The kittens sold for $3 each and the puppy sold for $7. How much money did they earn from selling the pets?

5) At a comic convention Katie wanted to buy 9 comics, but each one costs 5 dollars, plus it costs 8 to even get in. How much money should she take with her so she can get in and buy what she wants?

6) It takes 3 ounces of cheese to make a burrito and 9 ounces for a taco. If you wanted 7 burritos and 1 taco how many ounces of cheese would you need?

7) At band practice there were 5 rows of students with 6 students in each row and then another 9 students in the back. How many students were there total?

8) A malt shop used 2 ounces of chocolate syrup in their shakes and 9 ounces of syrup on their cones. If they sold 7 shakes and 1 cone, how many ounces of chocolate would they use total?

9) Edward spent $9 on a board game and then he bought 6 action figures for $3 each. How much money did he spend on the game and figures?

10) A music teacher had 6 recorders, but she decided to buy 7 more boxes with each box having 4 recorders in it. How many recorders did she have after buying the 7 boxes?

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____
