

**Solve each problem.****Answers**

- 1) Debby earned eight points for each bag of cans she recycled. If she had fifteen bags, but didn't recycle eight of them, how many points would she have earned?
- 2) John had six video games but two of them weren't working. If he wanted to sell the working games for \$8 each, how much money could he earn?
- 3) At the fair Dave bought fourteen tickets. After riding the ferris wheel he had seven tickets left. If each ticket cost four dollars, how much money did Dave spend riding the ferris wheel?
- 4) April's discount flowers was having a sale where each rose was four dollars. If April started with seven roses and had two roses left, how much money did she earn?
- 5) At lunch a waiter had sixteen customers and seven of them didn't leave a tip. If he got \$7 each from the ones who did tip, how much money did he earn?
- 6) Henry bought eight boxes of chocolate candy and gave two to his little brother. If each box has six pieces inside it, how many pieces did Henry still have?
- 7) There were eight friends playing a video game online when four players quit. If each player left had two lives, how many lives did they have total?
- 8) A new building needed thirteen windows. The builder had already installed four of them. If it takes two hours to install each window, how long will it take him to install the rest?
- 9) Each chocolate bar in a box cost \$8. If a box had nine bars total and Haley sold all but four bars, how much money would she have made?
- 10) A magician was selling magic card decks for seven dollars each. If he started with fifteen decks and by the end of the day he had six left, how much money did he earn?

1. _____
