

**Solve each problem.****Answers**

- 1) At the fair Luke bought fourteen tickets. After riding the ferris wheel he had seven tickets left. If each ticket cost seven dollars, how much money did Luke spend riding the ferris wheel?
- 2) At lunch a waiter had ten customers and eight of them didn't leave a tip. If he got \$5 each from the ones who did tip, how much money did he earn?
- 3) A painter needed to paint nine rooms in a building. Each room takes five hours to paint. If he already painted three rooms, how much longer will he take to paint the rest?
- 4) Amy earned four points for each bag of cans she recycled. If she had nine bags, but didn't recycle five of them, how many points would she have earned?
- 5) A trivia team had five members total, but during a game three members didn't show up. If each member that did show up scored nine points, how many points were scored total?
- 6) Ned had thirteen video games but nine of them weren't working. If he wanted to sell the working games for \$8 each, how much money could he earn?
- 7) A worksheet had seven problems on it. If a teacher had six worksheets to grade and had already graded three of them, how many more problems does she have to grade?
- 8) Sam earned nine dollars for each lawn he mowed. If he had fifteen lawns to mow, but forgot to mow six of them, how much money did he actually earn?
- 9) Tom invited eleven friends to a birthday party, but six couldn't come. If he wanted to buy enough cupcakes so each person could have exactly seven, how many should he buy?
- 10) Kaleb had five action figures, but needed thirteen total for a complete collection. If each one costs \$4, how much money would he need to finish his collection?
