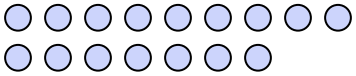
Subtracting Visually

Name:

Use the visual model to solve each problem.

1) There are 16 circles below.

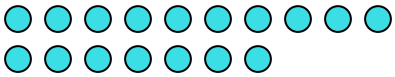


If you were to take away 2, how many would be left?
16 - 2 = ?

2) There are 15 triangles below.

If you were to take away 10, how many would be left?
15 - 10 = ?

3) There are 17 circles below.



If you were to take away 6, how many would be left?
17 - 6 = ?

4) There are 8 circles below.

If you were to take away 7, how many would be left?
8 - 7 = ?

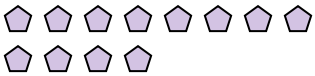
5) There are 6 squares below.

If you were to take away 1, how many would be left?
6 - 1 = ?

6) There are 9 rectangles below.

If you were to take away 2, how many would be left?
9 - 2 = ?

7) There are 12 pentagons below.

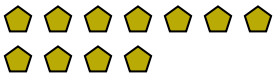


If you were to take away 6, how many would be left?
12 - 6 = ?

8) There are 20 triangles below.

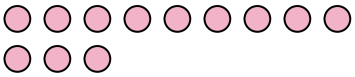
If you were to take away 7, how many would be left?
20 - 7 = ?

9) There are 11 pentagons below.



If you were to take away 10, how many would be left?
11 - 10 = ?

10) There are 12 circles below.



If you were to take away 2, how many would be left?
12 - 2 = ?

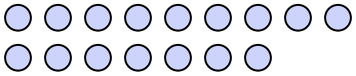
Subtracting Visually Name: **Answer Key**

Use the visual model to solve each problem.

1) There are 16 circles below.

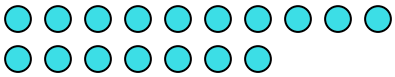


If you were to take away 2, how many would be left?
16 - 2 = ?

2) There are 15 triangles below.

If you were to take away 10, how many would be left?
15 - 10 = ?

3) There are 17 circles below.



If you were to take away 6, how many would be left?
17 - 6 = ?

4) There are 8 circles below.

If you were to take away 7, how many would be left?
8 - 7 = ?

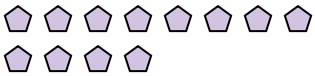
5) There are 6 squares below.

If you were to take away 1, how many would be left?
6 - 1 = ?

6) There are 9 rectangles below.

If you were to take away 2, how many would be left?
9 - 2 = ?

7) There are 12 pentagons below.

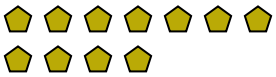


If you were to take away 6, how many would be left?
12 - 6 = ?

8) There are 20 triangles below.

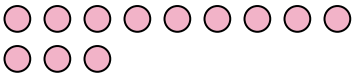
If you were to take away 7, how many would be left?
20 - 7 = ?

9) There are 11 pentagons below.



If you were to take away 10, how many would be left?
11 - 10 = ?

10) There are 12 circles below.



If you were to take away 2, how many would be left?
12 - 2 = ?
